

WHAT

CORONAVIRUS

Many people around the world are sick.

They have a new illness called the coronavirus.

The coronavirus spreads from person to person.

Anyone can become sick with the coronavirus.

The coronavirus gives people fevers and coughs.

Most

people

only

become

a little

sick.

But some

people

become

very sick.

The coronavirus spreads quickly.

Now the coronavirus is a pandemic.

A pandemic is when an illness spreads around the world.

People think the coronavirus started in China in 2019.

It spread to many countries, including the U.S.

Leaders and doctors around the world are working together.

They are working to stop the spread of the coronavirus.

To help stop the spread, you should:

● Wash hands often, for 20 seconds or more.

20

or

● Not touch eyes, nose and mouth.

+

● Call a doctor when you feel sick.

● Stay away from others in public places. *

* See this week's News-2-You Extension Activity for more things you can do.

Leaders and doctors worry about crowds.

Sick people can spread the coronavirus in crowds.

Many leaders have canceled events with crowds.

Leaders have canceled

Leaders have closed public places with crowds.

Leaders have closed

movie theaters,

museums,

restaurants,

zoos

and more.

Leaders have closed schools too.

Students are doing classes online in their homes.

Leaders do not want people to travel.

Sick people can spread the coronavirus to other places.

Airlines have canceled some flights.

Cruise ships have canceled some trips.

Many people are staying in their homes.

The coronavirus is a new illness.

Doctors are still learning about the coronavirus.

They hope to stop the spread of the coronavirus soon.

Then people can go to public places.

Leaders can open schools again.
